

4th ANNUAL GENERAL MEETING

DATE : 31ST MARCH 2012
TIME : 5.00PM
VENUE : MANMP CENTER

The 4th Annual General Meeting of the Malaysian Association of Natural Medicine Practitioners was successfully held on the 31st of March 2012.

This meeting was set to review plans and activities carried out in the year 2011 and to set new plans for the year 2012.

COMMITTEE MEMBERS OF THE MALAYSIAN ASSOCIATION OF NATURAL MEDICINE PRACTITIONERS FOR THE YEAR 2011 - 2013

THE 4TH ANNUAL GENERAL MEETING IN PROGRESS

THE 5 STUDENTS FROM MALACCA COLLEGE OF COMPLEMENTARY MEDICINE WHO ARE CURRENTLY UNDERGOING TRAINING AT AK PHARMACY AND NATUROPATHY CENTER UNDER THE GUIDANCE OF PROF.DR.ANANTHAN KRISHNAN

The participants included members from other Traditional Complementary Medicine Associations. Among the others who were present were the students from the Malacca College of Complementary Medicine.

The President of MANMP, Prof.Dr.Ananthan Krishnan expressed the need to plan and organize more activities to cater for the members of the Association and also to organize befitting programmes to promote the Association's interests. The following resolutions and recommendations were accepted and adopted at the meeting:-

1. An update on the MANMP website with pictorial reports.
2. To organize a National Conference on Healthcare and Medicine sometime in September this year.
3. To organize two Training Programmes on Natural Medicine for 2012.
4. A membership Drive.
5. A fund raising dinner and musical show in conjunction with the National Conference.

The difference between a Holistic Doctor and your local GP is that the holistic doctor looks at the issues of health and disease from a holistic or "whole body" philosophy. They treat the body, not just the symptoms that you present with. Holistic Doctors embrace the idea of treating the whole person in order to eradicate disease and promote a state of wellness.

"The doctor of the future will give *no* medicine, but will interest his patients in the care of the human frame, in *diet*, and in the *cause and prevention* of disease." (Thomas Edison)
